2006 - 2008 | Plovdiv, Bulgaria
-  **BS in Computer Science**  
2002 - 2006 | Plovdiv, Bulgaria

## EXPERIENCE

### Web Development Immersive at General Assembly

Jun 20115- Sept 2015 | Boston, US

As a software engineer I had already some software development experience. The projects that I had worked on were not web based and I have been eager to bridge that gap in my professional growth. Joining GA's WDI allowed me to get hands-on full time web experience. I got to learn **Ruby on Rails, JavaScript, jQuery, Node.js, AngularJS, Handlebars, PostgreSQL, MongoDB.**

### Software Developer at Nemetschek Bulgaria

Jun 2011 - Mar 2013 | Sofia, Bulgaria

As part of the international .NET development team, I worked on application used for **3D visualization** and data exchange of architectural/contractual elements. I participated in requirement discussions, prototyping sessions and software architectural planning. I designed and developed algorithms and user interfaces using **C# 3.5**. The tools used in the development process included **Visual Studio 2008, MS SQL Server** and **Perforce**.

### Marketing And Advertising Manager at PROFILINK Ltd

Oct 2007 - Apr 2011 | Plovdiv, Bulgaria

In a larger scale production company I started as a advertising specialist and my responsibilities were limited only to **assuring best quality** of collateral and media presence. With time and hard work I grew into a department manager. I had to **establish effective working relations** with contractors and advertising agencies and to ensure best presence of the company on the market. I organized and managed company events. The part I loved the most was working in a team.

### Prepress And Design Specialist at Impress Bulgaria

Jun 2006 - Aug 2007 | Plovdiv, Bulgaria

My main responsibility in a small print company was to prepare advertising materials for the printing machines. Those varied from business cards, full-sized product catalogs, to product packaging and corporate vehicle branding. I used **Adobe InDesign, Photoshop, Illustrator, Acrobat, Corel Draw and company-specific software** to keep track of work orders. I worked with clients on a daily basis to meet their visual design expectations and help them achieve their goals.
